EC 361–001

Problem Set 0

Prof. Santetti

Spring 2024

INSTRUCTIONS:

This Problem Set encompasses all 8 `R Practices` given in the `R Basics` section of the course. Combine all your code and written answers in a single R script saved with your first name (mine would be `marcio.R`). On `theSpring`, you can find a **template** file for your R script submissions. Please consider using it.

You will receive **full credit** (30 points) *by only submitting this assignment*. The idea here is to get as much practice as possible before the more specific Problem Sets come out.

Recall that group work is *strongly encouraged* for going over this and all Problem Sets.

Assignment due 02/16 (Fr), 12:20 PM.
Points Possible: 30

- You have 3 weeks to complete this assignment. In accordance with our `course syllabus`, no late submissions will be accepted.

- Be honest. Don't cheat.

- As a Skidmore student, always recall your votes of academic integrity, and the `Honor Code` you have abided by:

> "*I hereby accept membership in the Skidmore College community and, with full realization of the responsibilities inherent in membership, do agree to adhere to honesty and integrity in all relationships, to be considerate of the rights of others, and to abide by the college regulations.*"

Have fun!
